Tractor Pre-Start Checklist

F-047

Before using the tractor, the below pre-start checks must be carried.

Tick box if satisfactory

- Is the driver qualified (hold drivers licence) to drive the tractor?
- Check oil levels
- Check water levels
- Check fluid levels (brake and hydraulic)
- Are tyres inflated properly and in good condition?
- Do the brakes work? Also, park brake operating?
- Is the beacon light working?
- Is the cabin clean and free of loose tools or equipment?

To the best of my ability I consider that the tractor is in a safe working order.

Signed by the driver
