## Purpose

To prescribe the responsibilities of *Train Controllers* in the Oberon Tarana Heritage Railway (OTHR) Network.

## Responsibilities

The primary responsibility of the Train Controller is to manage *train* paths for the safe and efficient *transit* of *rail traffic* through the OTHR Network.

Train Controller *must* plan, set priorities for and manage:

- train services

- *work on track authorities*

- *Proceed Authorities*

- liaison with relevant *Operators* and *Maintenance Representatives* and external services during incident management

- available facilities to restore train services safely and promptly.

Train Controllers must:

- respond to equipment failures and warning alarms

- promptly report breaches of OTHR *Network Rules* and *Network Procedures* to the Network Operations Manager and affected *Operator's Representatives*.

Train Controllers must compile and maintain, in *permanent form*, relevant records and reports about conditions and movements in the OTHR Network.

## Related OTHR Network Procedures
